Hot Knowledge - 3D Stereo Animation
Since movie "Avatar" directed by James Cameron shows in theaters, 3D stereo technology becomes well-known by more and more people. Let me introduce 3D Stereo technology and some 3D videos to you in this month of Hot Knowledge.
What is Stereoscropy?
Stereoscropy (also called stereoscopic or 3-D imaging) is any technique capable of recording three-dimensional visual information or creating the illusion of depth in an image.
Check the original paragraph in Wikipedia
The best testament to how bad the 3D conversion for Clash of the Titans is is how many people have either mentioned it to me or have written about it themselves. I'm not talking about a bunch of movie geeks in an echo chamber, either. Just scanning through status updates and texts last weekend told the tale. People who I know never read about movies and who have no idea what the difference is between a film converted to 3D and a film that was actually shot in 3D were complaining about how they had just paid an extra \$5 to see a movie that looked, to put it kindly, like a pop-up book. It was the first time I can recall people actively regretting having seen a movie in 3D over 2D.
How to Train Your Dragon Official Trailer
A Very famous and successful 3D movie produced by DreamWork in 2010.
How to Train Your Dragon Official Trailer
The 3D Video Created by CrazyTalk6
CrazyTalk supports 'Side-by-Side' & 'Anaglyph (Red/Cyan)' outputs which allow you to view stereoscopic video with general or special monitor plus 3D glasses. Simply select the '3D Stereo Vision' option in the export panel of CrazyTalk, and you can become a leading 3D movie director.
